BOARD OF PUBLIC WORKS

Secretary Bose,

I'd like to express my support for Dominion Cove Point and to urge you to do the same. They have consistently shown their dedication to cultivating the welfare of this community both socially and economically. They have a long history of giving back to the community in many ways, including financially and in the development of many social, environmental, and economic programs to ensure that we thrive and stay competitive in this ever-changing economic climate.

Additionally, they have left no stone unturned in the drafting of their plans. Your exhaustive report shows this. Through your two years of research, you have shown that their plans are sound and environmentally responsible.

If we don't approve this project, the county would lose over \$60 million in additional revenue from personal income taxes and property taxes. We simply cannot afford to lose this kind of financial stability, not to mention the huge loss in an already strained job market.

Please conclude the excellent work you have done on this project, and give Calvert County the support it needs and deserves by approving the Dominion Cove Point LNG export proposal.

Thank you for your time and consideration,

Cynthia Redfield
